ONE SOURCE OF THE TRUTH

In the face of volatility, the farming team needs to be aligned. With Agstute, all parties involved can access your farm's financial information at any time and in any place. This'll enable informed decision-making, more accurate forecasting and budgeting, a high level of trust between stakeholders, and genuinely sustainable planning.

The ability to view accurate data in an instant means that everyone can work together to build a clear and progressive vision for the future.

YOU'LL GET A COMPLETE PICTURE OF YOUR FARM BUSINESS

Our easy-to-use, intuitive online tool clearly tracks all farm data so you can farm smarter

Progressive Production Tracking

Easily track livestock movements, crop and milk production as well as operating expenses.

Accurate Budgeting & Planning

Advanced accounting efficiency means that you're able to easily compare actual performance with planned performance.

Multi-Farm Management Made Easy

Bring together a multi-farm business and create one defined entity.

Accelerating Cashflow & Profit

Work out a real-time profit and loss position based on timing of payments, to see your monthly profit position.

Detailed Inventory Management

Easily track what's in storage, its value, its use, and the profitability of what it's been used on.

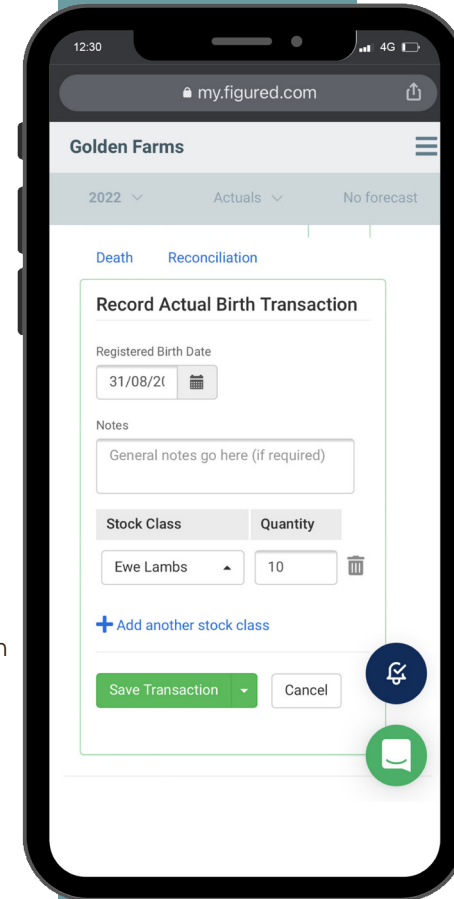

Comprehensive Data Integration

Automatically transfer your data and easily link it to other sources, for example your bank account.

Outstanding support

Our trained and insightful farm business analysts can visit your farm to input your data, and streamline the management of your finances.

ALL
YOUR
DATA
IN ONE
PLACE

Providing you with the insight and advice you need to accelerate the decision making process, and successfully grow your business

OUR SPECIALISTS ARE HERE TO HELP

Our experienced analysts and consultants can:

Get under the skin of your business to help you identify risks and opportunities, produce accurate forecasts, and plan for the future.

Work with you to set up our financial farm management tool, provide a detailed overview of how it works and critically, how to make the most of its capabilities.

Collaborate with your accountants to optimise your farm data, understand where you are and evaluate how you can evolve in order to build a forward-thinking business.

Complete and submit VAT returns, manage cashflow and easily analyse your data to make financial decisions with pinpoint accuracy.

Be the **reliable companion** you need so that you can get on with important farming work.

Our large network of farm businesses and comparative information means we can also benchmark your farm's performance and challenge assumptions used in budgets.

A BETTER WAY TO MANAGE GROWTH

Agstute leverages cloud technology to create a user-friendly and intuitive experience that is guaranteed to set you up for future success.

It is compatible with any device.

Data can be shared, with permission.

There is a high level of security, with multilevel protection and encryption.

Reporting, planning & forecasting is fully integrated.

Easy to use interface

The software is updated and improved based on customer feedback. These improvements are made continuously and require no action from you.

Invaluable support

You'll have access to comprehensive resources to help you get started, as well as clear guidance on training. Our specialists will also provide bespoke and responsive support.

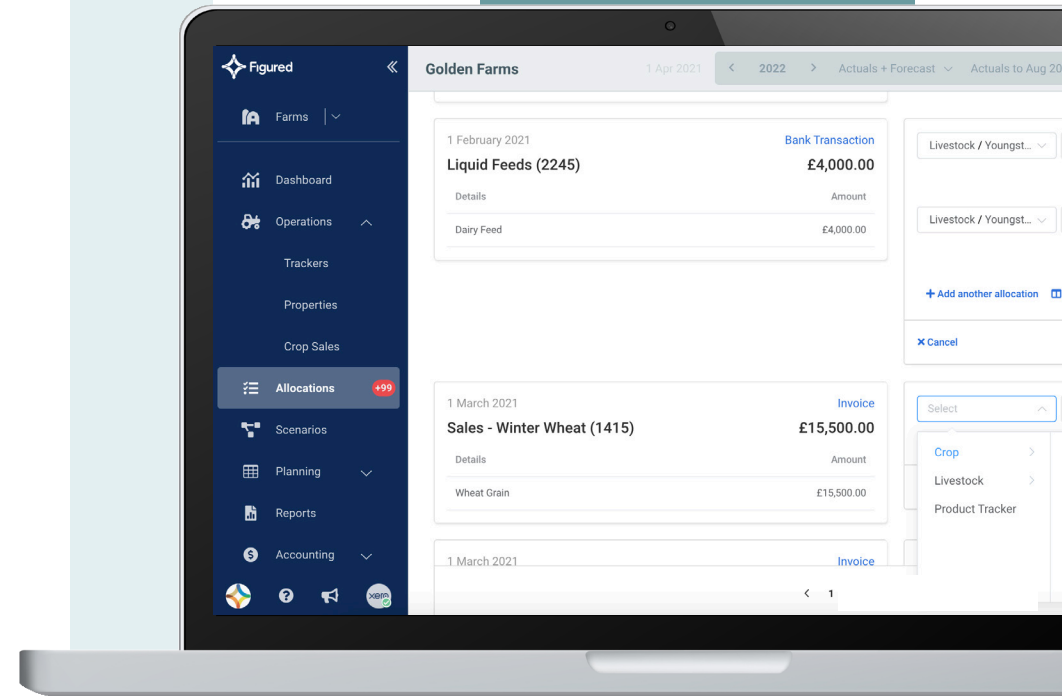

It's extremely accessible

There is no reliance on having software loaded onto your device. Agstute can be used anywhere and at any time.

Seamless transfer of data

Data doesn't have to be transferred between systems, so everyone is always looking at the same numbers.

We've worked with **Figured** & **Xero** to create a user-friendly and intuitive experience

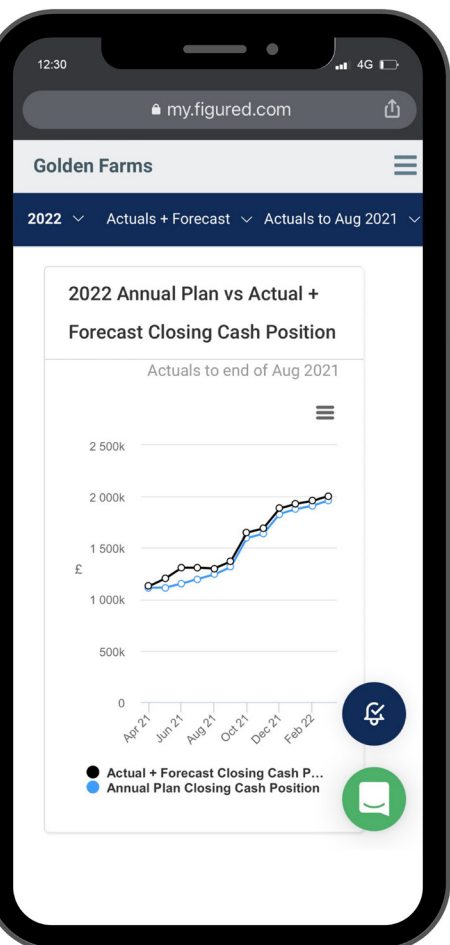

Easily turn
data to your
advantage

OUR PACKAGES

Data to drive your farm business

Simple pricing options to suit every farm type.

Agstute Accounts

OUR PARTNERS

WHY OUR CUSTOMERS LOVE AGSTUTE

As the UK's leading provider of farm finance consultancy, we work with farm businesses of all sizes and across multiple enterprises, to transform how well they perform.

Together, we're evolving farm businesses as we know them, working collaboratively to create innovative and forward-thinking strategies that will succeed in a new era of agriculture.

“ I wanted a program that was quick to learn, easy to use and would help me to share information safely and securely. I also wanted a tool that would help me plan and make better, more informed decisions.

Agstute has ticked all of these requirements and is a huge step forward compared to our old accounting programme.”

Will Hosford, Dairy Farmer in Dorset
